

COLLEGE OF ENGINEERING ACHIEVEMENT

ACADEMIC, INNOVATION AND TECHNOLOGICAL ACHIEVEMENT

1. International Engineering Training Programme – Zhejiang Polytechnic University, Hangzhou, China

The College of Engineering recorded a significant academic, innovation, and technological achievement through the participation of its students in an international engineering training programme at Zhejiang Polytechnic University of Mechanical and Electrical Engineering in Hangzhou, China. **The programme was held from June to July 2026**, providing students with an immersive international learning and practical engineering experience.

The programme provided students with valuable exposure to advanced engineering technologies, modern machinery, industrial equipment, and contemporary manufacturing systems. Participants had the opportunity to observe and interact with technologies that are currently limited or less accessible within the Nigerian engineering environment, providing practical insight into their applications and potential.

Beyond technical exposure, the programme broadened the students' understanding of international engineering practices, technological development, innovation, and modern approaches to engineering education and manufacturing. It also provided an opportunity to connect classroom-based knowledge with real-world industrial applications.

This achievement reflects the College of Engineering's commitment to providing students with practical learning opportunities, international exposure, technological

awareness, and experiences that prepare them to contribute meaningfully to the advancement of engineering and technology in Nigeria.

The programme further strengthens the College's vision of producing globally competitive engineers equipped with the knowledge, practical experience, innovative mindset, and technological awareness required to address contemporary engineering challenges.

2. 10-Year Memorandum of Understanding Between ABUAD and United Nigeria Airlines

Afe Babalola University, Ado-Ekiti (ABUAD), recorded a significant academic and industrial achievement through the signing of a **10-year Memorandum of Understanding (MoU) with United Nigeria Airlines on February 6, 2026**.

The partnership is aimed at providing ABUAD engineering students with enhanced opportunities for **hands-on internship and Student Industrial Work Experience Scheme (SIWES) training**, bridging the gap between theoretical classroom learning and practical industrial experience.

As part of the implementation of this partnership, the **first cohort of 400-level Aeronautical and Astronautical Engineering students commenced a six-month industrial training programme in March 2026**. The programme provides students with practical exposure to the aviation industry, allowing them to develop technical skills and gain firsthand experience. This collaboration represents a significant step towards strengthening industry-academia relations and enhancing the quality of practical engineering education at ABUAD. It provides students with valuable opportunities to apply their academic knowledge in professional environments while developing the competence and experience required for successful careers in the aviation and engineering sectors.

The long-term partnership further demonstrates the University's commitment to producing industry-ready graduates and creating sustainable pathways for practical training, professional development, and technological advancement.

This achievement reflects ABUAD's continued efforts to strengthen collaboration with leading industry stakeholders and provide engineering students with meaningful opportunities to gain practical experience and compete effectively in the global engineering and aviation industry.

SPORTS ACHIEVEMENT

Anthony Chioke – MVP, NBA REC University Tournament

The College of Engineering recorded a remarkable sporting achievement through the outstanding performance of **Anthony Chioke**, who was named the **Most Valuable Player (MVP)** of the NBA REC University Tournament held in Lagos, Nigeria.

Representing Afe Babalola University, Ado-Ekiti (ABUAD), Anthony demonstrated exceptional skill, determination, teamwork, and leadership throughout the tournament, earning recognition as one of the outstanding players of the competition.

His achievement serves as a reflection of the talent and versatility of students within the College of Engineering, demonstrating that excellence extends beyond academics and technical pursuits into sports and other areas of personal development.

The College celebrates Anthony Chioke for this outstanding accomplishment and recognizes his achievement as a source of pride to the College and the University at large. His success further highlights the importance of supporting students in pursuing excellence across both academic and extracurricular activities.
